

DEEBOX CHOPRA

DRUM BOX TO 2" TAPE

WAV (16bit / 44.1kHz) VERSION

Deebox Chopra is a sample pack which features drum sounds from an iconic 80s drum machine run through a series of high quality analog outboard gear to 2" tape to add a bit of "hiss" and extra warmth.

Features:

- 1 kit, 49 drum sounds from an iconic 80s drum machine
- 16 bit/44.1kHz
- 8 Presets/Signal Chains: a variety of 8 signal chains totaling to over 700 samples giving the kit slightly different tone variation options
- Tape distorted/driven drums and lightly saturated drums included in separate folders*
- Recording chain used includes: 2" tape machine, DBX 160XT , API 550 EQ, Pultec EQ, and a Holy Grail pedal
- Compatible with all major software DAWs including; Ableton Live, Apple Logic, Pro Tools, FL Studio, Propellerheads Reason, etc.
- Compatible with all hardware samplers that accept the WAV file format; Akai MPC samplers, Roland MV8000, Yamaha samplers, etc.

**The hard driven drums will tend to have less tape hiss and more of the gentle distortion in which the tape medium provides while the lightly saturated drums will still have punch but more tape hiss than the former.*

8 Signal Chains:

Preset 1 - API 550a-> Pultec EQ-> DBX 160XT-> 2" tape

Preset 2 - API 550a-> 2" tape

Preset 3 - API 550a

Preset 4 - holy grail (dry)-> API 550a-> Pultec EQ-> DBX 160XT-> 2" tape

Preset 5 - holy grail (wet)-> API 550a-> Pultec EQ-> DBX 160XT, 2" tape

Preset 6 - Pultec EQ-> DBX 160XT-> 2" tape

Preset 7 - Pultec EQ-> 2" tape

Preset 8 - 2" tape
